

Partnering to End Polio
through the use of
Innovative Approaches to
reach Every Last Child

📅 21 - 24 January 2025

📍 Brazzaville, Republic of Congo

Session III: GIS Applications and Innovative Technologies in Public Health: Reflections on Past GIS Summit Recommendations

Martin De Wulf, CTO @Bluesquare

PROJECT HIGHLIGHT

Global Polio Elimination Initiative (GPEI) Campaign Planning and Tracking

KEY PARTNERS: WHO AFRO, UNICEF, Global Polio Eradication Initiative (WHO, CDC, BMGF)

DATA INTEGRATION AND PROCESSING

Use of two Bluesquare software data platforms ([IASO](#) and [OpenHEXA](#)) for the integration of the following data flows from 68 countries:

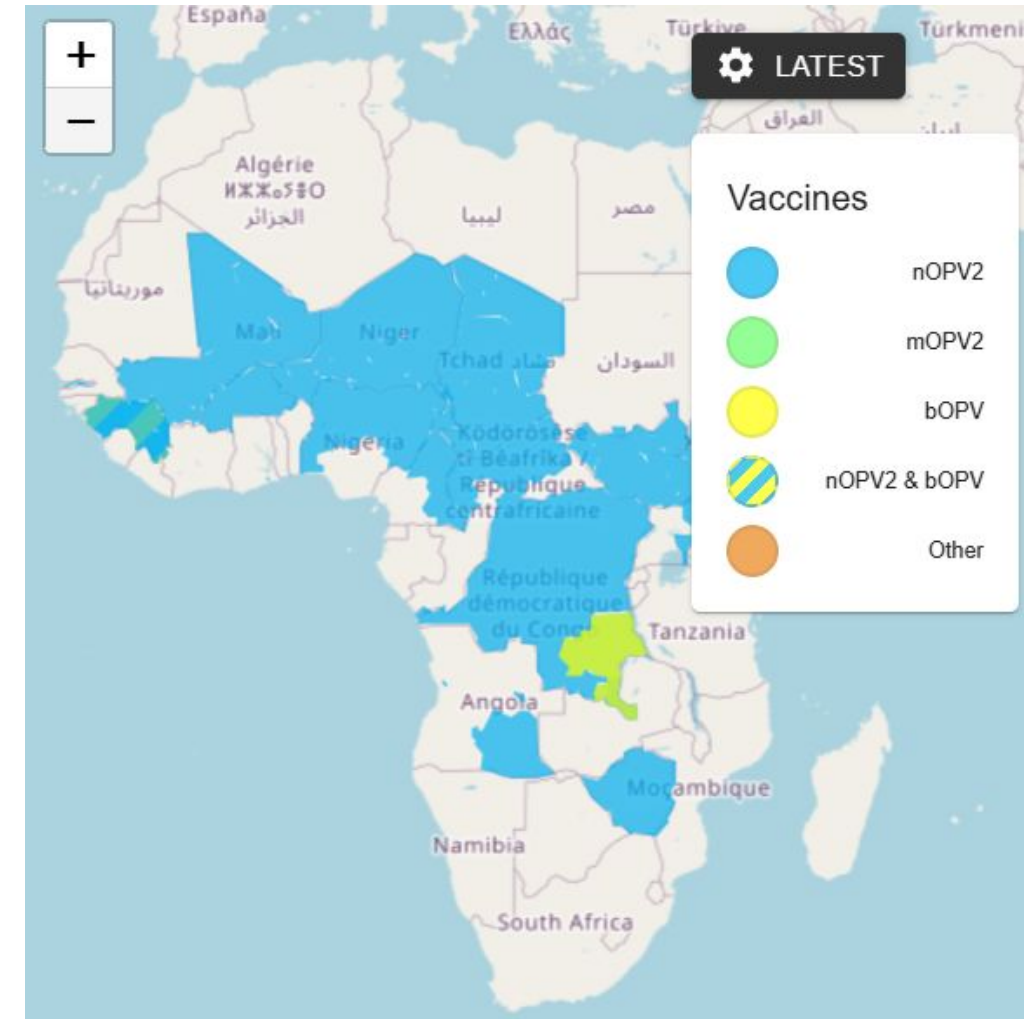

- geographical scope,
- round dates,
- key planning dates,
- preparedness level,
- virus cases,
- monitoring and evaluation with key indicators

OUTCOMES

A dedicated [web app \(poliooutbreaks.com\)](#) is used to manage polio vaccination campaign data, including data before, during, and after campaigns, with a strong emphasis on geographical data management, to organize the data and present it on maps.

Dashboards embedded in the WHO website (RRT hub), including notably:

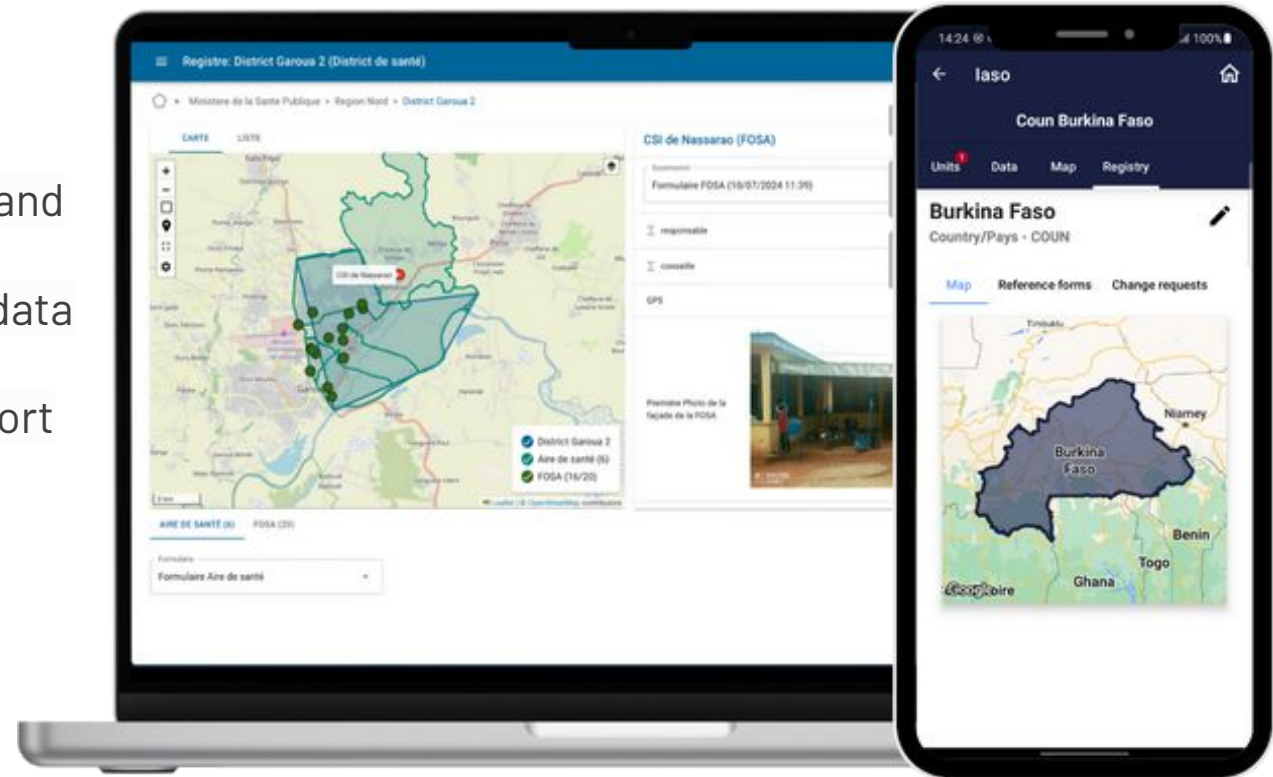

- SIA calendar with scopes per vaccine type
- Preparedness levels tracking
- Vaccines management: real-time stocks monitoring, cold chain, chronogram of activities, stocks levels reports

IASO is an open source Georegistry

- Manage your **Master Facility Lists**
- **Data validation:** users propose changes and supervisors can **approve or reject**
- **Compare, Match and Merge** geographic data sources
- **Geopackage, DHIS2 and CSV** import/export
- **DHIS2** bi-directional integration
- **Track changes** to your geo data
- **Data versioning**
- **Public visualization interface**

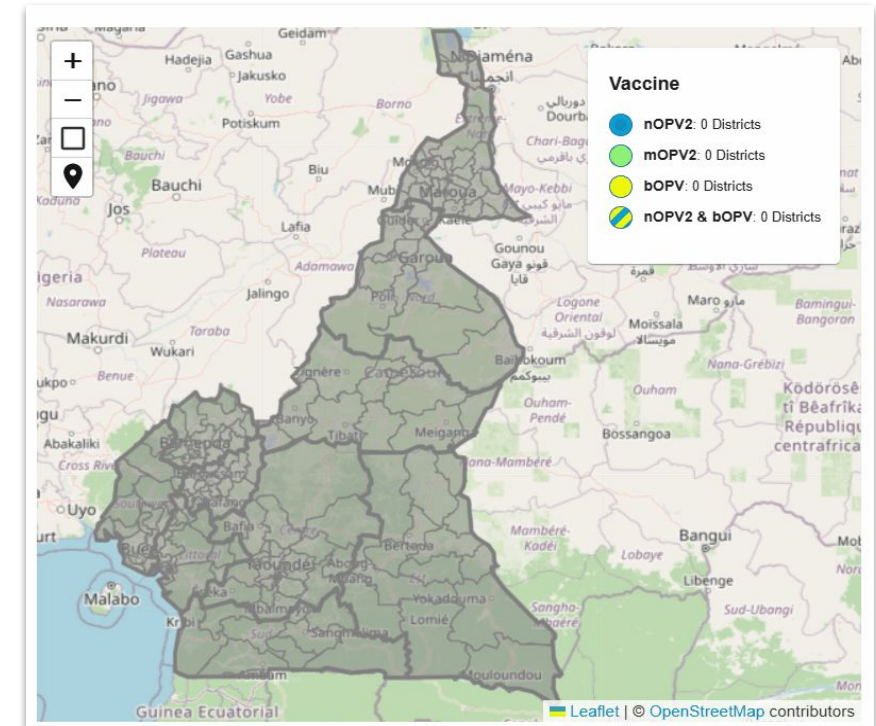

<https://www.openiaso.com/>

Recognized as a **Digital Public Good**

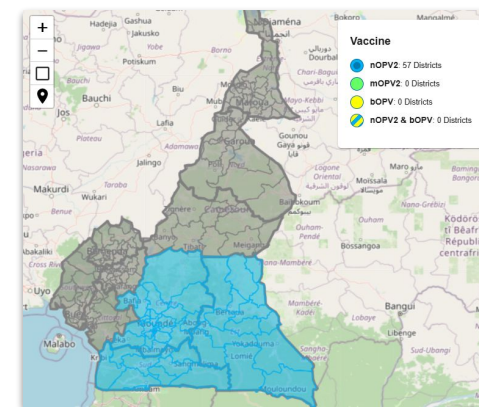

Campaigns data entry

- Key dates
 - Rounds
 - Virus notification
 - Budget approval
 - LQAS/IM
- Geographic scope
 - Per vaccine type (nOPV2, mOPV2, bOPV, nOPV/bOPV)
- Risk assessment
 - Target population
 - Target age groups
- Evaluation (LQAS/IM)
- Preparedness

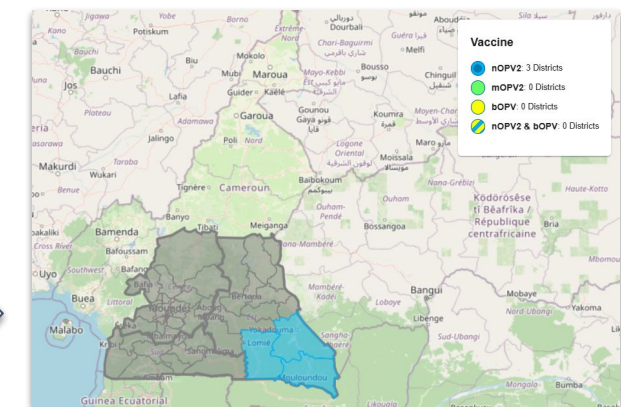

Recent additions

- Integrated campaigns: Polio, Measles, PIRI, Vitamin A, Rubella, Deworming, Yellow Fever
- Sub-activities:
 - Geographic scope within Round scope
 - Dates
 - Target age group
 - LQAS/IM dates

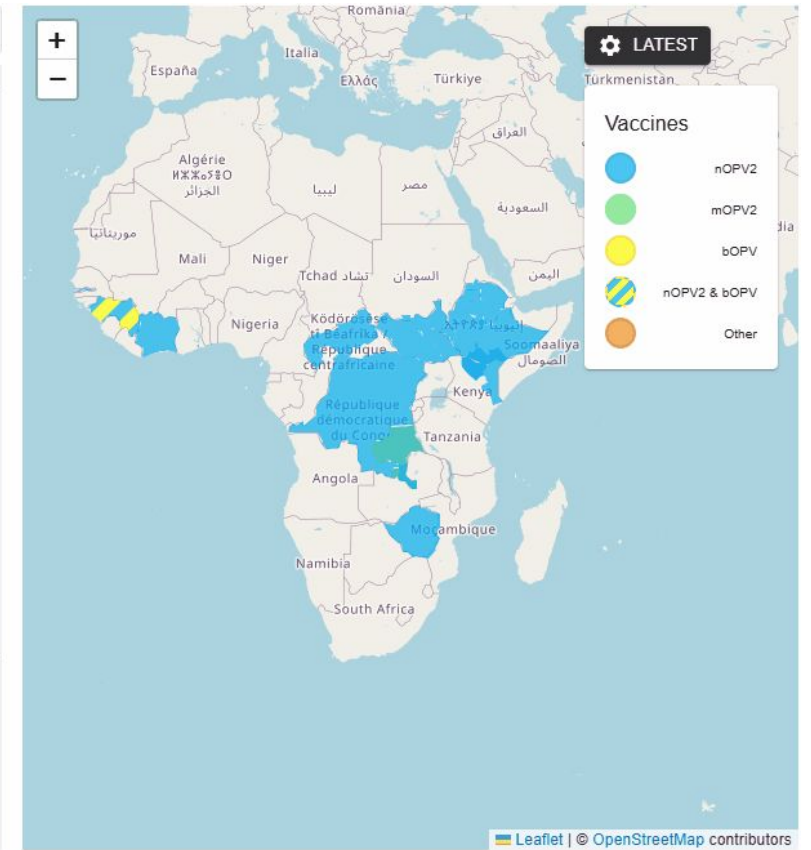

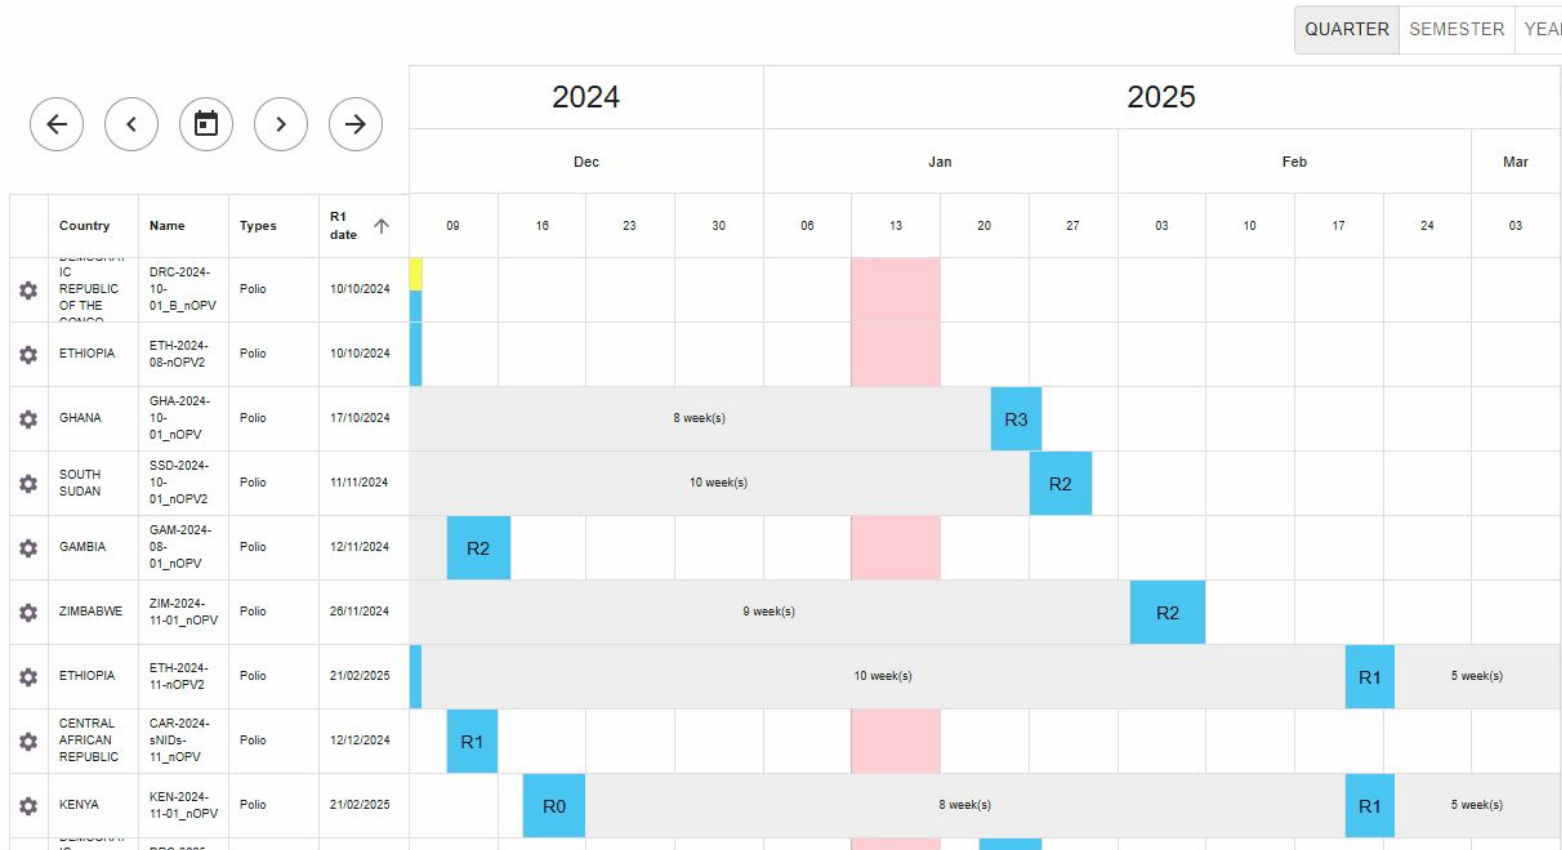

Round geographic scope

Sub-activity geographic scope

Key data reflected on SIA calendar visualization

- Campaign type (Polio or other), Geographic scope, Round dates, Vaccine type
- Geographic scope per Round XLS download available (list of Districts in scope & vaccine type)

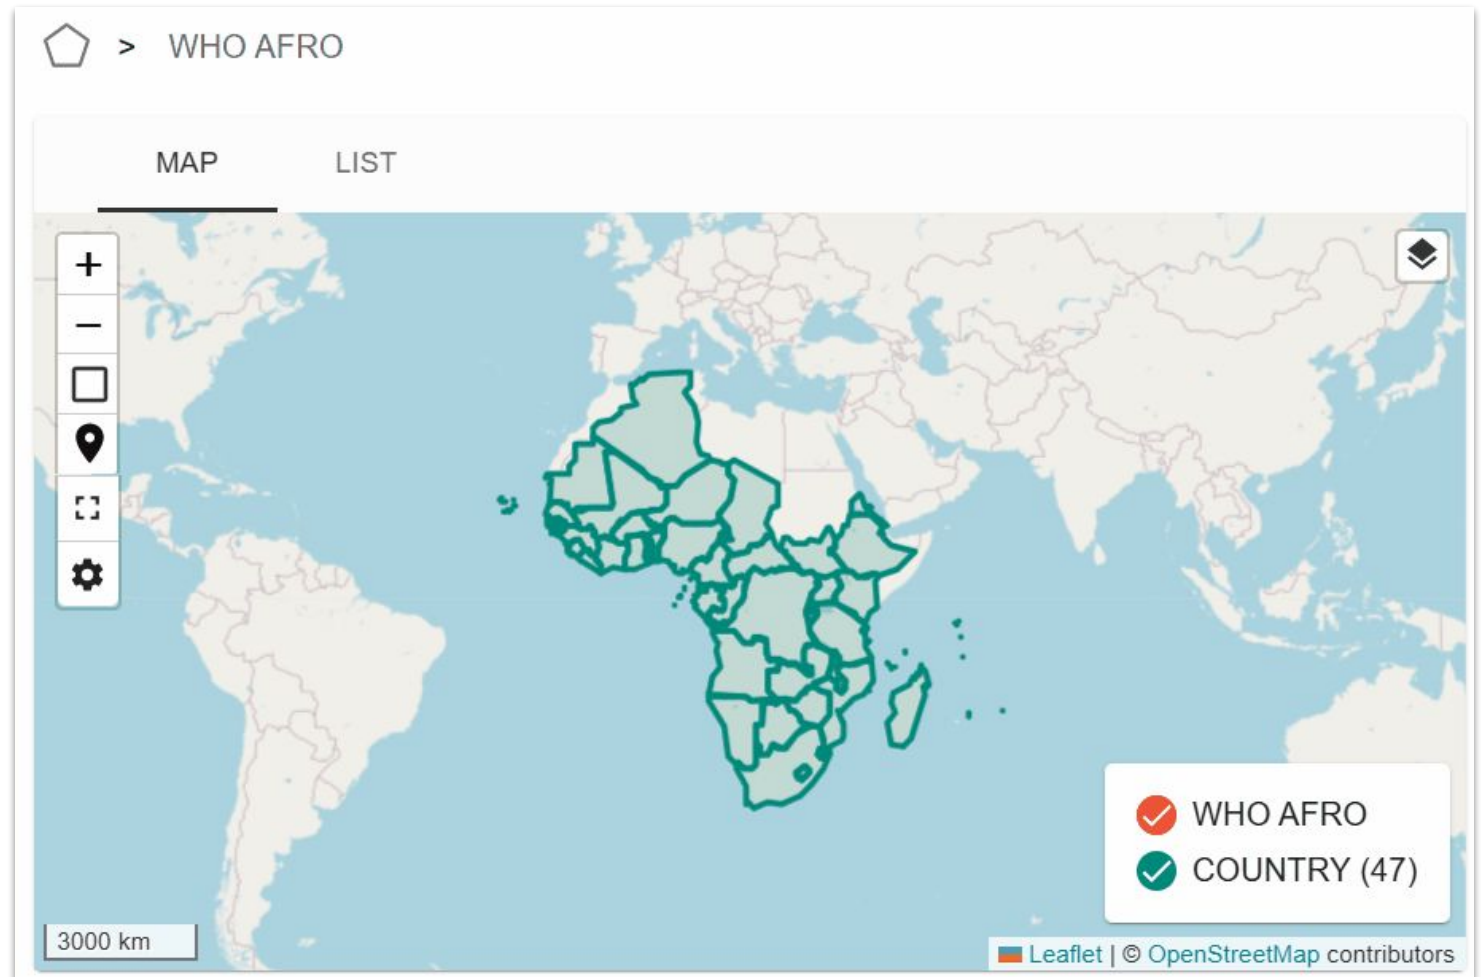

User-friendly geographic data management

- Organization of hierarchies (Country > Region > District > Health facilities)
- Upload of Geopackages for easy map visualizations
- Central repository of Master Facility Lists updated based on each country's ODK forms

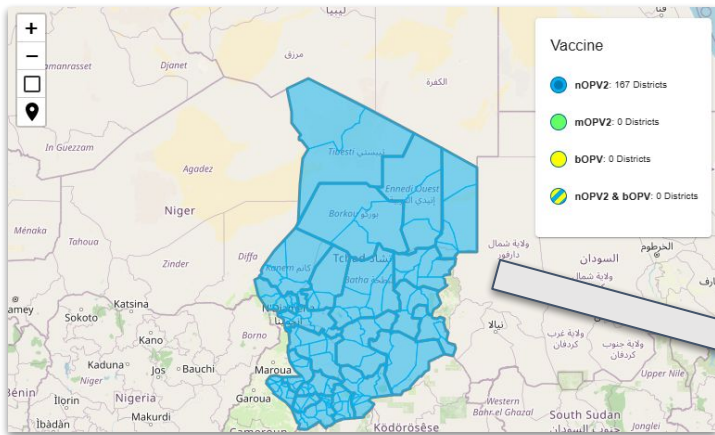

Automation of Geographic data import from ODK forms

- Email alerts ahead of Round start dates for ODK geographic data updates
 - Stocks monitoring
 - Form A
 - LQAS
 - IM
- Internal supervision dashboard
 - Country configurations
 - Check correct round number
 - Check correct OBR name

Generation of Preparedness Google sheets based on poliooutbreaks platform's geographic data

- Geographic scope used to generate adapted Preparedness Google sheets
- Daily snapshots of Preparedness levels per level (National, Regional, District)
- Dashboard displaying preparedness levels in real time
- Weekly emails to country GPEI coordinators to update info & preparedness level in EN, FR or PT

GENERATE A SPREADSHEET
Generate a google sheet

EN, FR or PT

Geographic data reflected in sheet tabs
(Country/Region/Districts)

Weekly evolution of preparedness

Activities List

Status: All

Campaign	Period	Task	Deadline Date	Status	Delay (days)
DRC-2024-sNIDs_nOPV	Before	Estimate vaccine needs for both rounds based on risk analysis	01/10/2024	Done	0
DRC-2024-sNIDs_nOPV	Before	Update the nOPV2 national logistics plan (needs, transport, waste management and management tools) and integrate the improvement plan and logistics strategies for special populations	01/10/2024	Done	0
DRC-2024-sNIDs_nOPV	Before	Develop and transmit to the RRT the vaccine request form	03/10/2024	Done	0

The platform is now quite stable and the next step is full platform transfer to WHO AFRO

Day to day challenges

- Main challenge is maintenance of the master district and facilities list
- Geographic data alignment between ODK forms and the platform
 - Last minute changes done on facility lists in forms, sometimes during campaigns, impacting data quality and dashboard reliability for instant decision-making
